

## **ARPANSA Diagnostic Imaging Liaison Panel**

- There is no set schedule of meetings. Meetings will be planned as required and the timing of each meeting will be negotiated with the participants.
- Meetings will be via teleconference, unless a representative is based in Melbourne and is able and willing to travel to ARPANSA's Yallambie premises.
- Liaison Panel members will also be able to contribute viewpoints via e-mail should they be unable to participate in any given meeting.
- Any given meeting should be no longer than 2 hours and we will endeavour to keep to one hour per meeting.
- The initial meeting is likely to be the longest as it will likely address all issues (even if it refers detailed discussion of an issue to a separate future meeting), including any issues raised by the participants that were not canvassed in the initial report.
- Nominated representatives are expected to keep their relevant nominating organisation informed of the content of the meetings and where necessary consult within their organisation to ensure that the general views of their organisation are being appropriately represented as far as possible.
- The principal aim of the meetings is to review the existing Australian National MDCT DRLs in the light of the data collected by the NDRLS over its operation since 2011, and any other data considered relevant, and agree on a proposal to amend the Australian National MDCT DRLs that will be put to the official channels of the participating organisations for endorsement and subsequent publication on ARPANSA's website as the updated Australian National MDCT DRLs.
